

ASPECTS SHEET

To be used in analysis

Quantitative: amount and discrete quantity

Spatial: continuous extension

Kinematic: movement

Physical: energy, mass, forces, etc.

Biotic: life functions

Sensitive / Psychic: sensing, response, feeling, emotion

Analytic: distinction and clarity

Formative: our ability to shape things, concepts, organisations, etc., and with technology and history

Lingual: symbolic signification: documentation, programming, etc. and providing the basis for communication

Social: inter-personal relationships and social institutions and structures

Economic: frugality, resources, and management of these

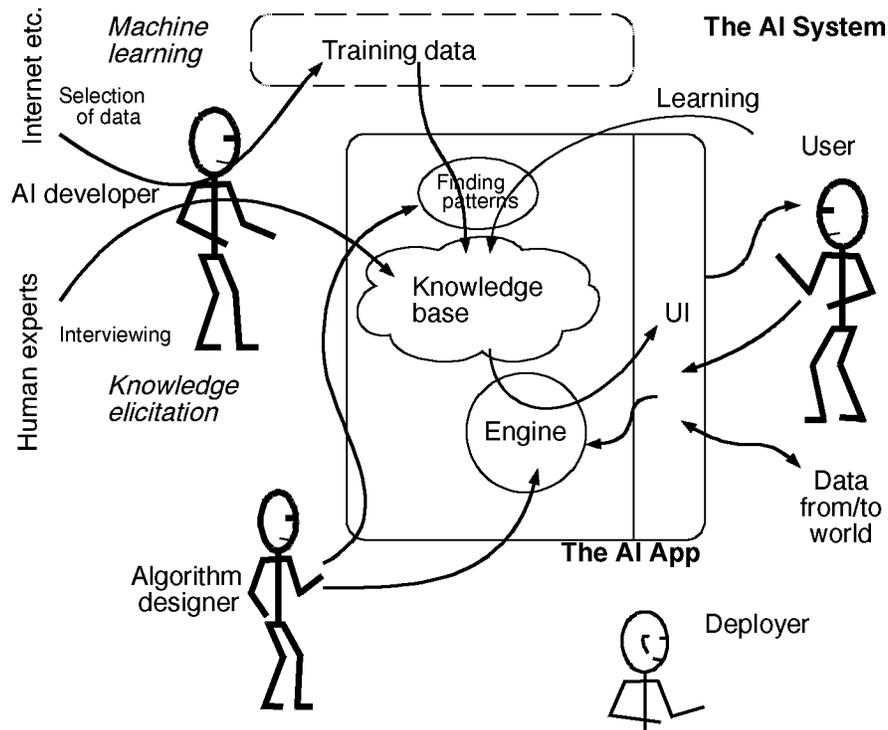

Aesthetic: harmony (as in music), play, fun, interest, surprise, etc.

Juridical: 'what is due' to all, and legal rules and enforcement

Ethical: self-giving, generosity, going beyond what is due

Pistic / Faith: faith, vision, commitment.

Basic Makeup of AI

Aspectual Analysis

Method 1:

For any text or situation, identify its important or significant components (e.g. words, phrases in text) and ask "Which aspect(s) make this meaningful, and in what way?"

Method 2:

Use the aspects to guide your thinking about it. Analysis can proceed in three ways:

- 2a. Go through each aspect in turn, from quantitative to pistic, asking in what ways the thing expresses this aspect.
- 2b. Go through each aspect in turn, in the reverse direction, from pistic to quantitative, asking in what ways the thing expresses this aspect.
- 2c. Begin with the most obvious aspects, then proceed to ones that these remind you of, and finally ask about any aspects not yet covered.
